

***BILI-THERAPY** Spot Type*

LED Phototherapy Unit

Effective Phototherapy Treatment and Space-saving

Mount Type

Effective phototherapy treatment by blue LEDs

- Appropriate irradiation intensity can be selected by installing High & Low irradiation switching function.
- Promote early hospital discharge by reducing the treatment time in providing high irradiation intensity and effective wavelength.

Space-saving

- The unit can be mounted on the F-Rail without using a stand for space-saving around the incubator or warmer.

Switchable to examination lamp with one-touch of a button

- As an examination lamp, the condition of an infant can be monitored. (White LEDs) The dimmer function that is ideal for developmental care is available.

BILI-THERAPY Spot Type

Atom's code	Description
60361	Arm Type
60377	Mount Type
60360	Stand Type

Options & Supplies

Atom's code	Description
60382	Pole Attachment high-load
60218	Pole Attachment
60217	F-Rail Attachment

Specifications

Power requirement	Customer specified
Power consumption	30VA
Frequency	50/60Hz
Type of protection	Class II
Degree of protection	No applied part
Dimensions	Arm type : 1000(W)x130(D)x450(H) mm Stand type : 450(W)x710(D)x1900(H) mm Mount type (Irradiation head) : 125(W)x330(D)x80(H) mm Mount type (Power source part) : 180(W)x340(D)x110(H) mm

Weight	Arm type : Approx. 2.2Kg Stand type : Approx. 12Kg Mount type (Irradiation head) : Approx. 0.9Kg Mount type (Power source part) : Approx. 0.9Kg
Accessories	Power cord Hood top surface cap(Mount Type)
Light source	Blue LEDs
Irradiance level	High:30-40μW/cm ² /nm Low:14-21μW/cm ² /nm obtained by the BiliBlanket® Meter II at the irradiation distance of 30cm
Illumination intensity	Approx. 500-2000lux (Distance from light source:30cm)

Atom Medical products are produced under strict production control in Japan.
We provide value and trust of the highest quality for the tiny baby lives in the world.
