

High-Flow Therapy in Pediatric Care: A Cornerstone of Readiness and Stabilization

Tuesday, January 27, 2026

MORNING: 9 am PST / 11 am CST / 12 pm EST

AFTERNOON: 1 pm PST / 3 pm CST / 4 pm EST (recorded)

1.0 CRCE CREDIT (RTS), 1.00 CERP (RNS)

Dr. David Nelson

MD, FAAP, FAAEM

Develop your clinical understanding of high-flow therapy in pediatric care with our upcoming EIA webinar.

High-Flow Therapy in Pediatric Care: A Cornerstone of Readiness and Stabilization

Facilitated by Dr. David Nelson, MD, FAAP, FAAEM, the session will explore:

- The clinical rationale for nasal high-flow therapy in pediatric patients
- Current evidence supporting the use of nasal high-flow therapy as a stabilization strategy
- The concept of pediatric readiness and its impact on patient outcomes
- Integration of nasal high-flow therapy in pediatric readiness frameworks

Dr. Nelson has wide-ranging experience in both clinical and research settings, with a focus on pediatric care and emergency preparedness. He is an Associate Professor of Emergency Medicine and Pediatrics, serves as Pediatric Clinical Advisor to the Vermont Healthcare Emergency Preparedness Coalition, and leads the Vermont Child Health Improvement Program.
